EDUCATION

B.Tech (Computer Science and Engineering) 2023 – 2027

CGPA: 8.17 (till 4th Semester)

HSC (12th, Science) 2021 – 2023

Yashwantrao Highschool & Junior College, Deorashtre

Percentage: 68.33%

SSC (10th) 2020 – 2021 Vithamata Vidyalaya, Karad

Percentage: 90.40%

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript

Frontend: HTML, CSS, React.js

Backend: FastAPI, Node.js

Database: MySQL, SQL, Firebase, MongoDB

Tools and Platforms: Git, GitHub, VS Code, Eclipse, Vercel, Render, Postman

SOFT SKILLS

Coordinated college events as an event volunteer by handling planning and execution .

Strong communication and collaboration skills developed through hackathons and academic projects

Effective problem-solving and decision-making abilities in fast-paced environments

Highly adaptable with a strong ability to learn and implement new technologies quickly

PROJECT EXPERIENCE

- **Smart Health Assessment System**

Developed a full-stack web application using Python, FastAPI, REST API, MySQL, HTML5, CSS3, JavaScript and machine learning to predict disease risk by performing data preprocessing, model training, and evaluation. Integrated MySQL database for efficient data storage and retrieval. built a responsive user interface for real-time result visualization, helps to enabling early health risk detection.

- **Resume Analyzer Project**

Developed Resume Analyzer web app using Python, Machine Learning, MySQL REST API, HTML5, CSS3, JavaScript that parses resumes, evaluates skills and keyword relevance against job roles, and provides real-time match scores and improvement suggestions. Developed the complete pipeline including data preprocessing, model training, Utilized Python libraries such as Pandas, TensorFlow, and Matplotlib for data processing, model development, and visualization, with backend integration for database storage and management. helps to reduce human bias in resume evaluation.

- **Plant Disease Detection System**

Developed a full-stack web application using Python, MySQL, HTML5, CSS3, JavaScript, and machine learning to detect plant leaf diseases through image-based classification. Performed data preprocessing, model training, and evaluation using deep learning techniques for accurate prediction. Integrated MySQL database for efficient data storage and retrieval of user inputs and results. enabling early crop disease detection and improved agricultural decision-making.

CERTIFICATES & INTERNSHIPS

- **Cybersecurity Analyst Virtual Internship – Forage (Sep 2025)**

Completed industry-style simulation focused on Identity and Access Management (IAM), including strategy evaluation, custom IAM solution design, and secure platform integration, strengthening practical cybersecurity and access control skills.

- **Cybersecurity Analyst Virtual Internship – Forage (Sep 2025)**

worked on Identity and Access Management (IAM) strategy evaluation, secure system design, and implementation concepts, enhancing skills in cybersecurity frameworks, access control, and information security practices.

CONCLUSION

Motivated Computer Science student skilled in full-stack development, machine learning, and backend systems with hands-on project experience. Strong in C, C++, Java, Python, teamwork, and problem-solving, with a passion for building real-world, scalable applications.
